PHYSICS **Max Marks: 62**

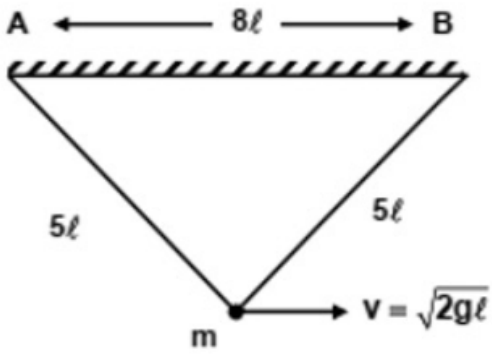

SECTION – I
(ONE OR MORE CORRECT ANSWER TYPE)

This section contains 8 multiple choice questions. Each question has 4 options (A), (B), (C) and (D) for its answer, out of which ONE OR MORE than ONE option can be correct. **Marking scheme: +4 for all correct options & +1 partial marks, 0 if not attempted and -1 in all wrong cases**

Section 1 (Max Marks: 32)

- Section 1 contains eight questions.
- Each Question has Four Options and Only One of these four will be the correct answer.
- For each question, choose the option corresponding to the correct answer
- The Marking scheme to evaluate the Answer to each question:
  Full Marks: +4 (If the answer is correct)
  Partial Marks: +3 (If all the four options are correct but only 3 are chosen)
  Partial Marks: +2 (If THREE or More options are correct but only 2 correct answers are chosen)
  Partial Marks: +1 (If TWO or More options are correct but only 1 correct answer is chosen)
  Zero Marks: 0 (If the question is unanswered)
  Negative Marks: -1 (In all other cases)

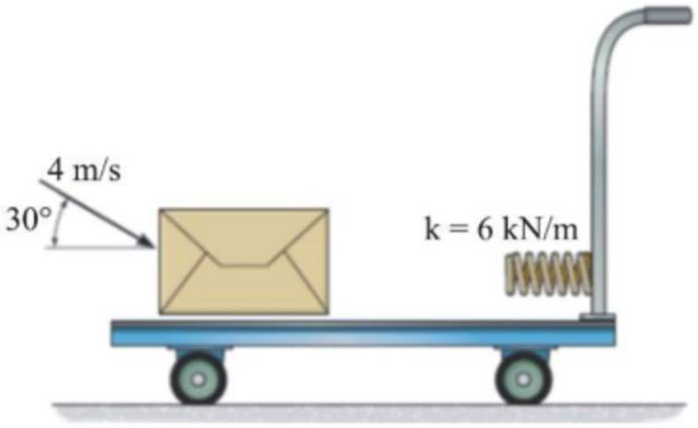

1. An ideal smooth massless inextensible string passes through the bead as shown whose ends are fixed at A and B. Initially the system is in equilibrium, now bead is given a velocity $\sqrt{2gl}$ in horizontal direction and in the plane of the string as shown. Let T_0 be the tension in the string and r_0 be the radius of curvature of particle just after the velocity is given. Then choose the correct option(s).

A) $T_0 = \frac{31mg}{30}$ **B)** $r_0 = \frac{35\ell}{3}$ **C)** $T_0 = \frac{41mg}{40}$ **D)** $r_0 = \frac{25\ell}{3}$

2. The 40-kg package is thrown with a speed of 4 m/s onto the cart having a mass of 20 kg. If it slides on the smooth surface and strikes the spring, determine the velocity u_c of the cart at the instant the package fully compresses the spring. What is the maximum compression x of the spring? Neglect rolling resistance of the cart. What is the velocity v_p of the package after the spring comes back to the natural length? What is the velocity v_c of the cart at the instant?

A) $u_c = \frac{4}{\sqrt{3}} m/s$ **B)** $v_c = \frac{8}{\sqrt{3}} m/s$ **C)** $v_p = \frac{2}{\sqrt{3}} m/s$ **D)** $x = \sqrt{\frac{2}{75}} m$

3. A parallel-plate capacitor is connected to a cell. Its positive plate A and its negative plate B have charges $+Q$ and $-Q$ respectively and then the cell is disconnected from the capacitor. A third plate C, identical to A and B, with charge $+Q$ is now introduced midway between A and B, parallel to them. Which of the following are correct?

A) The charge on the inner face of B now is $\frac{-3Q}{2}$

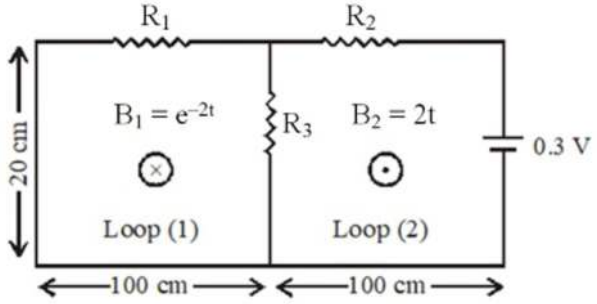

B) There is no change in the potential difference between A and B

C) The potential difference between A and C is one-third of the potential difference between B and C.

D) The charge on the inner face of A now is $\frac{Q}{2}$

4. Shown in figure is a simple network of three resistors $R_1 = 1\Omega$, $R_2 = 2\Omega$ and $R_3 = 3\Omega$. A battery of emf 0.3 volt is connected. The dimension of the loop are given. In loop (1) inward magnetic field $B_1 = e^{-2t}$ is applied and in loop (2) outward magnetic field $B_2 = 2t$ is applied. Find the initial current flown through the resistor R_3 and R_2. (t is time)

A) initial current in $R_3 = \frac{9}{110} A$ **B)** initial current in $R_2 = \frac{6}{110} A$

C) initial current in $R_2 = \frac{8}{110} A$ **D)** initial current in $R_3 = \left(\frac{1}{110} + \frac{1}{20}\right) A$

5. Heater -1 **take** 10 minutes to increase temperature of liquid (A) of mass 2 kg by $20^0 C$ when connected with 200 V supply. Heater -2 takes 20 minutes to increase temperature of liquid B of mass 4 kg by $20^0 C$ when connected with 400 V supply.

Given: Specific heat of liquid A = 6000 J/kg^{0}C

Specific heat of liquid B = 12000 J/kg^{0}C

Select correct option (s)

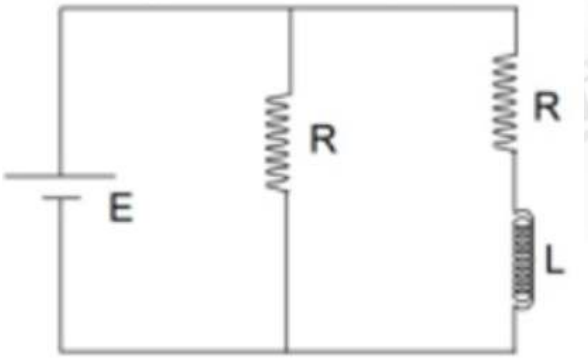

A) The power of heater -1 is 400 watt

B) The resistance of heater -2 is 200Ω

C) If both heaters are connected in series to a 300 V supply the time taken to increase temperature of liquid A by 30^{0}C is 20 min.

D) If both heaters are connected is parallel to a 300 V supply then time taken to increases temperature of liquid $-B$ by 27^{0}C is 16 min.

6. In the circuit diagram shown

10. A photoelectric plate is initially exposed to an emission spectrum of hydrogen gas excited to first excited state. Later when the same photoelectric plate is exposed to an emission spectrum of some unknown hydrogen like gas, excited to the first excited state, it is found that de-broglie wavelength of the fastest photoelectrons now ejected has decreased to $\sqrt{6.1}$ times. For this new gas difference of energies of first lyman line and series limit of Balmer series is found to be two times the ionization potential of the hydrogen atom. Find the work function (in eV) of the photoelectric plane.

11. A body starts with an initial velocity of 10 m/s and moves along a straight line with a constant acceleration. When the velocity of the particle becomes 50 m/s the acceleration is reversed in direction without changing magnitude. Find the speed of the particle is m/s when it reaches the starting point.

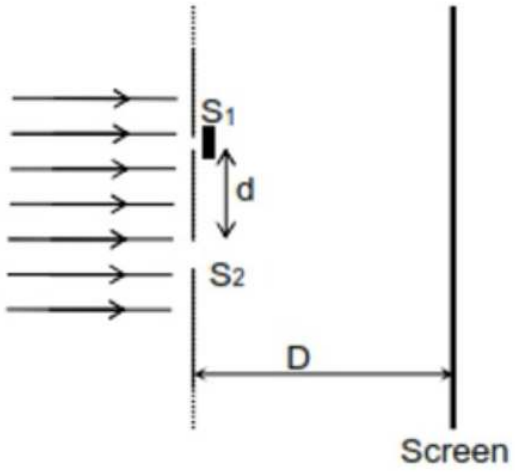

12. A curved thick glass surface is silvered at curved face & not silvered on plane surface. Object is placed at A as shown in figure. Considering P (pole of the silvered surface) as origin. If x-co-ordinate of final image is 'n' cm then find n.

13. A monochromatic light of wave length $\lambda = 6000\,\text{Å}$ is used and incident on two slits S_1 and S_2 as shown. The width of slits S_1 and S_2 are different in such a way the intensity on the screen due to the slit S_2 is 9 times the intensity due to the slit S_1 on the screen. The distance between the two slits S_1S_2 is $d = 1\,mm$ and the distance between the slits and the screen is $D = 2m$. A mica sheet of refractive index $\left(\mu = \frac{4}{3}\right)$ and thickness $t = 0.1\,\mu m$ is kept in front of slit S_1. Assuming both the slits behave like coherent sources. The minimum distance between the two points on the screen which have intensities equal to the $\left(\frac{1}{4}\right)^{th}$ of the maximum intensity on the screen is 'a' mm.

The value of 'a' is _____

14. A standing wave exists in a string of length 150 cm and is fixed at both ends. The displacement amplitude of a point at a distance of 10 cm from one of the ends is $5\sqrt{3}\ mm$. The distance between the two nearest points, within the same loop and having displacement amplitude equal to $5\sqrt{3}\ mm$, is 10 cm. Find the mode of vibration of the string i.e., the harmonic produced.

SECTION-III
(MATCHING LIST TYPE)

This section contains 4 questions, each having two matching lists (List-1 & List-II). The options for the correct match are provided as (A), (B),(C) and (D) out of which ONLY ONE is correct.
Marking scheme: +3 for correct answer, 0 if not attempted and -1 in all other cases.
Section 3 (Max Marks: 12)

- This Section contains two (02) List-Match sets.
- Each List-Match set has TWO (02) Multiple-choice Questions
- Each List-Match set has two lists: List 1 and List 2
- List 1 has four entries (I), (II), (III), (IV) and List 2 has six entries (P), (Q), (R), (S), (T) and (U)
- Four options are given in each multiple choice question based on List 1 and List 2 and Only ONE of these four options satisfies the condition asked in the Multiple Choice Question.

Answer to each question will be evaluated according to the following marking scheme
Full Marks: +3 (If only the option corresponding to the correct combination is chosen))
Zero Marks: 0 (If none of the options is chosen (i.e. the question is unanswered)
Negative Marks: -1 (In all other cases)

31. A sample of ferrous sulphate and ferrous oxalate was dissolved in dil H_2SO_4. The complete oxidation of reaction mixture required 40 mL of N/15 $KMnO_4$. After the oxidation, the mixture was reduced by Zn and H_2SO_4. On again oxidation by same $KMnO_4$, 25 mL were required. Calculate the ratio of Fe in ferrous sulphate and oxalate.

32. A 3.0 g sample of Cu_2O is dissolved in dil. H_2SO_4 where it undergoes disproportionation quantitatively. The solution is filtered off and 8.3 g pure KI crystals are added to clear filtrate in order to precipitate CuI with evolution of I_2. The solution is again filtered and boiled till all the I_2 is expelled. Now excess of an oxidizing agent is added to filtrate which liberates I_2 again. The liberated I_2 this time requires 10 mL of 1.0 N $Na_2S_2O_3$ solution. Calculate % by mass of Cu_2O in sample

SECTION-III
(MATCHING LIST TYPE)

This section contains 4 questions, each having two matching lists (List-1 & List-II). The options for the correct match are provided as (A), (B),(C) and (D) out of which ONLY ONE is correct.

Marking scheme: +3 for correct answer, 0 if not attempted and -1 in all other cases.

Section 3 (Max Marks: 12)

- This Section contains two (02) List-Match sets.
- Each List-Match set has TWO (02) Multiple-choice Questions
- Each List-Match set has two lists: List 1 and List 2
- List 1 has four entries (I), (II), (III), (IV) and List 2 has six entries (P), (Q), I, (S), (T) and (U)
- Four options are given in each multiple choice question based on List 1 and List 2 and Only ONE of these four options satisfies the condition asked in the Multiple Choice Question.

Answer to each question will be evaluated according to the following marking scheme

Full Marks: +3 (If only the option corresponding to the correct combination is chosen))

Zero Marks: 0 (If none of the options is chosen (i.e. the question is unanswered)

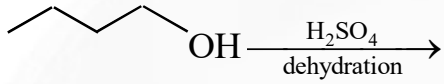

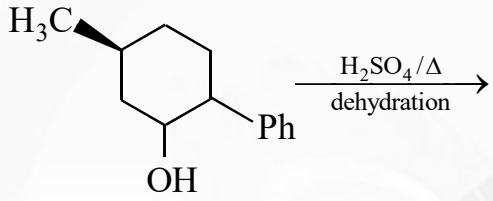

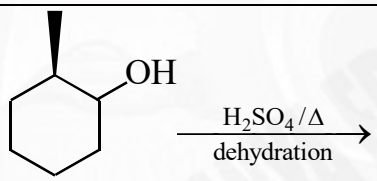

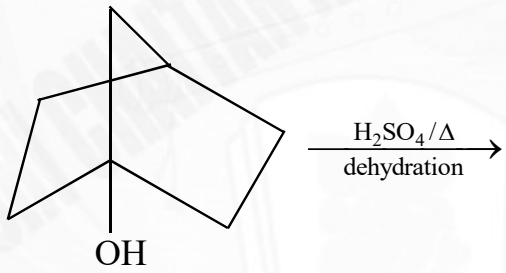

Negative Marks: -1 (In all other cases)

Answer Q.33 and Q.34 by appropriately matching the list based on the information given in the paragraph

Match each species in List – I with appropriate statement(s) of List – II and choose correct option:

	List – I		List - II
(P)		**(1)**	At least one of the product shows optical isomerism
(Q)		**(2)**	Major product contains even number of α-hydrogen's (Hydrogen's which can involve in hyper conjugation)
(R)		**(3)**	One of the product shows geometrical isomerism
(S)		**(4)**	Reactant can turn acidified dichromated to green
		(5)	Will not undergo dehydration

33. Which of the following option has incorrect combination considering List-1 and List-2 ?

A) P-2,3,4 B) Q-1,2,4 C) R-3,4 D) S-5

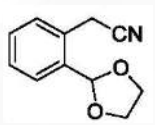

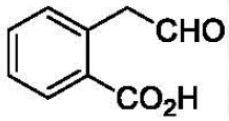

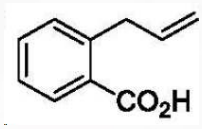

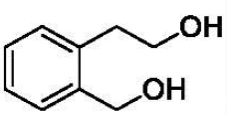

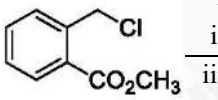

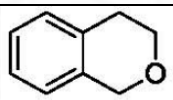

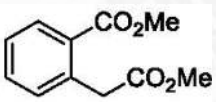

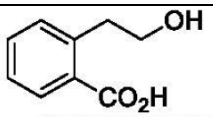

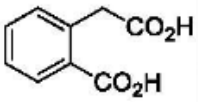

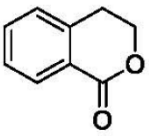

34. Which of the following option has correct combination considering List-1 and List-2 ?

A) P-1,2 B) Q-4,5 C) R-4 D) S- 3

Answer Q.35 and Q.36 by appropriately matching the list based on the information given in the paragraph

List – I includes starting materials and reagents of selected chemical reactions. List – II gives structure of compounds that may be formed as intermediate products and/or final products from the reactions of List - I

List – I		List - II	
I)	 i)DIBAL – H ii) dil.HCl iii)$NaBH_4$ iv) conc.H_2SO_4	**(P)**	
II)	 i) O_3 ii) Zn, H_2O iii) $NaBH_4$ iv) conc.H_2SO_4	**(Q)**	
III)	 i)KCN ii)H_3O^+, Δ iii) $LiAlH_4$ iv) conc.H_2SO_4	**(R)**	
IV)	 i)$LiAlH_4$ ii) conc.H_2SO_4	**(S)**	
		(T)	
		(U)	

35. Which of the following options has correct combination considering List – I and List – II

A) (II), (P), (S), (U) B) (II), (P), (S), (T)

C) (I), (Q), (T), (U) D) (I), (S), (Q), (R)

36. Which of the following options has correct combination considering List – I and List – II

A) (III), (S), (R) **B)** (IV), (Q), (U) **C)** (IV), (Q), (R) **D)** (III), (T), (U)

MATHEMATICS

Max Marks: 62

SECTION – I
(ONE OR MORE CORRECT ANSWER TYPE)

This section contains 8 multiple choice questions. Each question has 4 options (A), (B), (C) and (D) for its answer, out of which ONE OR MORE than ONE option can be correct. **Marking scheme: +4 for all correct options & +1 partial marks, 0 if not attempted and -1 in all wrong cases**

Section 1 (Max Marks: 32)

- Section 1 contains eight questions.
- Each Question has Four Options and Only One of these four will be the correct answer.
- For each question, choose the option corresponding to the correct answer
- The Marking scheme to evaluate the Answer to each question:
  Full Marks: +4 (If the answer is correct)
  Partial Marks: +3 (If all the four options are correct but only 3 are chosen)
  Partial Marks: +2 (If THREE or More options are correct but only 2 correct answers are chosen)
  Partial Marks: +1 (If TWO or More options are correct but only 1 correct answer is chosen)
  Zero Marks: 0 (If the question is unanswered)
  Negative Marks: -1 (In all other cases)

37. Given ellipse $\frac{x^2}{16}+\frac{y^2}{7}=1$ and the hyperbola $\frac{x^2}{144}-\frac{y^2}{81}=\frac{1}{25}$, if the ordinates of one of the points of intersection is produced to cut asymptote at P, then which of the following is true?

A) square of the ordinate of point of intersection is $\frac{25}{63}$

B) square of the ordinate of point of intersection is $\frac{63}{25}$

C) sum of the square of coordinate of P is 16

D) P lies on the auxiliary circle formed by ellipse

38. M is a 3×3 matrix with integers entries. For M we have sum of entries in column 2 is equal to 4 times the sum of entries in column 1, sum of entries in column 3 is 4 times the sum of entries in column 2. Also sum of entries in Row 2 exceeds the sum of entries in row 1 by 6 and sum of entries in row 3 exceeds the sum of entries in row 2 by 6. Then which of the following is /are incorrect.

A) The sum of all the entries in M must be divisible by 3 only

B) None of the row sums is divisible by 7

C) One of the column sums must be divisible by 7

D) The sum of all the entries in M must be divisible by 21

39. $f: N \to A$ and $g: N \to B$ are two onto functions such that $f(n) = \left[n \sec^2 \theta\right]$ and $g(n) = \left[n \operatorname{cosec}^2 \theta\right]$, for some θ. If $\sec^2 \theta$ is irrational, then (where [.] denotes the greatest integer function)

A) $A \cap B = \phi$ **B)** $A \cup B = N$

C) f and g are bijective **D)** $A \cap B$ is non-empty finite set

40. Let α, β are the roots of equation $x^2 - a_1 x + 1 = 0$ and consider the sequence of numbers $a_r, (r \geq 0)$ with $a_0 = 1$ and $a_{r+1}^2 = 1 + a_r a_{r+2}$, then which among the following option(s) is/are correct

A) $a_r + a_{r+2} = a_1 a_{r+1}$ **B)** $a_r + a_{r+2} = 2a_{r+1}$

C) $a_n = \dfrac{\alpha^{n+1} - \beta^{n+1}}{\alpha - \beta}$ **D)** $a_n = \dfrac{\alpha^{n+1} + \beta^{n+1}}{\alpha + \beta}$

41. Let position vectors of points A, B, C are $\vec{a}, \vec{b}, \vec{c}$ respectively where $\vec{c} = x\vec{a} + y\vec{b}$

A) If $x + y = 1,\ x > 0, y < 0$ then C lies on line AB but not on line segment AB

B) If $x > 0,\ y > 0,\ x + y < 1$ then C lies inside the triangle ABO

C) If $x < 0,\ y > 0$ and $x + y > 1$, then on plane containing points O, A, B, the points C and origin lies on opposite side of line AB.

D) If $x \leq 0,\ y \leq 0$ and $x + y = -1$, then locus of point C is reflection of line segment AB about origin.

42. Which of the following statements are correct (where c integration constant)

A) The solution of the differential equation $y\left(x^2 y + e^x\right)dx - e^x dy = 0$ is $x^3 y + 3e^x = 3cy$ (where c is constant)

B) The solution of $\dfrac{xdx + ydy}{xdy - ydx} = \sqrt{\dfrac{a^2 - x^2 - y^2}{x^2 + y^2}}$ is $\tan^{-1}\left(\dfrac{y}{x}\right) + \sin^{-1}\left(\dfrac{\sqrt{x^2 + y^2}}{a}\right) = c$

(given 'a' <0)

C) $xdy = \left(y + x^2 + 9y^2\right)dx$ then its solution is $\tan^{-1}\left(\dfrac{3y}{x}\right) = 3x + c$

D) The solution of the differential equation $\dfrac{dy}{dx} - y\dfrac{\phi'(x)}{\phi(x)} = \dfrac{-y^2}{\phi(x)}$ is $\phi(x) = (x + c)y$

43. Let M and N be 3×3 matrices. Define $S=\left\{x\in R^{3\times1}:Mx=0\right\}$. Given that $n(S)>1$ and $\mathbf{N+3I=MN+2M}$, choose the CORRECT option(s) from the following:

Note: $x\in R^{3\times1}$ denotes that x is a 3×1 column matrix of real numbers

A) $N^2+5N+6I$ is a singular matrix

B) The cardinality of the set $\left\{x\in \mathrm{R}^{3\times1}:Mx=x\right\}$ is equal to 1

C) $MN^2-N^2M=I$

D) Let $T=\left\{x\in R^{3\times1}:Mx=b\right\}$, where $b\in R^{3\times1}$ is constant. If $p\in \mathrm{T}$, then for all $n\in S,\ p+n\in T$

44. Let

$$\mathbf{N}=2^{200}\left({}^{200}\mathrm{C}_0\right)\left({}^{200}\mathrm{C}_{100}\right)-2^{198}\left({}^{200}\mathrm{C}_1\right)\left({}^{199}\mathrm{C}_{99}\right)+2^{196}\left({}^{200}\mathrm{C}_2\right)\left({}^{198}\mathrm{C}_{98}\right)-.....+\left({}^{200}\mathrm{C}_{100}\right)\left({}^{100}\mathrm{C}_0\right)$$

then

A) N is equal to the coefficient of x^{100} in $(1-x)^{200}$

B) The number of zeros at the end of N is only one

C) $\mathrm{N}=3^{101}\times k$ where k is an integer

D) N is equal to the number of ways of distributing 200 different objects among 2 persons equally

SECTION – II
(NUMERICAL VALUE TYPE)

This section contains 6 questions. Each question is numerical value type. For each question, enter the correct numerical value **(e.g. 003.2343, 6.250023, 7.000000, -0.33, -.30, 30.27000, -127.0030).**

Marking scheme: +3 for correct answer, 0 if not attempted and 0 in all other cases. Section 2 (Max Marks: 18)

- Section two contains six (6) questions. The answer to each question is a NUMERICAL VALUE
- For each question enter the correct numerical value of the answer using the mouse and the on-screen virtual numerical keypad in the place designated to enter the answer. If the numerical values has more than two decimal places, truncate/round off the value to TWO decimal places.

Answer to each question will be evaluated according to the following marking scheme

Full Marks: +3 (If only the correct numerical value is entered)

Zero Marks: 0 (In all other cases)

45. P is any point and O being the origin. On the circle with OP as diameter two points Q and R are on same side of OP such that $\angle\mathbf{POQ}=\angle\mathbf{QOR}=\theta$. Let P, Q, R be z_1, z_2, z_3 such that $2\sqrt{3}z_2^2=\left(2+\sqrt{3}\right)z_1z_3$. The degree measure of θ is α^0, then $\frac{\alpha}{3}$ is _____ (in degrees)

46. The equation of plane of a ΔABC is $\frac{x}{a}+\frac{y}{b}+\frac{z}{c}=\lambda$ and lengths of sides of ΔABC opposite to vertices A, B, C are respectively p, q, r. Mid points of sides of ΔABC lies on coordinate axes.

If $a^2=\frac{q^2+r^2-p^2}{2}$, $b^2=\frac{p^2+r^2-q^2}{2}$ and $c^2=\frac{p^2+q^2-r^2}{2}$ then value of $\left|\frac{1}{\lambda}\right|$ is

47. Tangent is drawn at the point (x_i, y_i) on the curve $y=f(x)$ (lying in the first quadrant), which intersects the x-axis at $(x_{i+1}, 0)$. Now again a tangent is drawn at (x_{i+1}, y_{i+1}) on the curve which intersects the x-axis at $(x_{i+2}, 0)$ and the process is repeated 'n' times. If $x_1, x_2, x_3 .....x_n$ form a G.P. with common ratio 'r' and curve $y=f(x)$ is a hyperbola with eccentricity equal to 'e' then $r+e^2$ is equal to _____

48. Let $I=\int_0^{\pi/2}\frac{\cos x+4}{3\sin x+4\cos x+25}dx$ and $J=\int_0^{\pi/2}\frac{\sin x+3}{3\sin x+4\cos x+25}dx$.

If $(11I+2J)=a\pi+b\ ln\frac{c}{d}$ where a, b, c and $d\in N$ and $\frac{c}{d}$ is not a perfect square of a rational then find the value of (a + b + c + d – 55)

49. Let $y=f(x)(f:R\to R)$ be an explicit function defined by the implicit equation $x^3+y^3+3(x^2+y^2)+3(x+y)=14$ and g be the inverse function of f.

If $\frac{d}{dx}(f(x+gx)).g(x+f(x))$ at $x=-1+\sqrt[3]{15}$ is equal $\lambda(15)^{2/3}$, where $\lambda\in I$, then find the value of $|\lambda|$

50. If α, β are two distinct real roots of the equation $ax^3+x-1-a=0, (a\neq -1, 0)$, none of which is equal to unity, then the value of $\lim_{x\to\frac{1}{a}}\frac{(1+a)x^3-x^2-a}{(e^{1-ax}-1)(x-1)}$ is $\frac{al(k\alpha-\beta)}{\alpha}$.

Find the value of kl.

SECTION-III
(MATCHING LIST TYPE)

This section contains 4 questions, each having two matching lists (List-1 & List-II). The options for the correct match are provided as (A), (B),(C) and (D) out of which ONLY ONE is correct.

Marking scheme: +3 for correct answer, 0 if not attempted and -1 in all other cases.

Section 3 (Max Marks: 12)

- This Section contains two (02) List-Match sets.
- Each List-Match set has TWO (02) Multiple-choice Questions
- Each List-Match set has two lists: List 1 and List 2
- List 1 has four entries (I), (II), (III), (IV) and List 2 has six entries (P), (Q), I, (S), (T) and (U)
- Four options are given in each multiple choice question based on List 1 and List 2 and Only ONE of these four options satisfies the condition asked in the Multiple Choice Question.

Answer to each question will be evaluated according to the following marking scheme

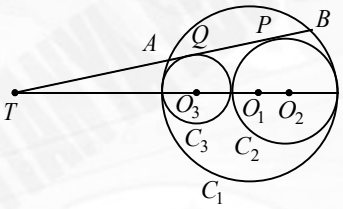

Full Marks: +3 (If only the option corresponding to the correct combination is chosen))

Zero Marks: 0 (If none of the options is chosen (i.e. the question is unanswered)

Negative Marks: -1 (In all other cases)

Answer Q.51 and Q.52 by appropriately matching the list based on the information given in the paragraph

3 circles C_1, C_2 and C_3 with centres O_1, O_2 and O_3 of radius 9, 6 and 3 respectively touches each other as shown in figure. A chord AB to circle C_1 touches circles C_2 and C_3 at P, Q respectively. Line PQ meets line joining centres of C_2 and C_3 at T, D is mid-point of Q and O_2.

List-I		List-II	
A)	Length of chord PQ is	P)	$3\sqrt{2}$
B)	Length of chord AB is	Q)	$4\sqrt{14}$
C)	Length of TP is	R)	$6\sqrt{2}$
D)	Length O_3D is	S)	$4\sqrt{7}$
		T)	$2\sqrt{14}$
		U)	$12\sqrt{2}$

51. Which of the following is the only correct combination?

A) A-P **B)** A-U **C)** B-Q **D)** B-S

52. Which of the following is the only incorrect combination?

A) B-Q **B)** C-T **C)** D-P **D)** D-T

Answer Q.53 and Q.54 by appropriately matching the list based on the information given in the paragraph

Let $f(x)=\begin{cases}[2x], & -1\le x<1\\ |2x|; & 1\le x\le 2\end{cases}$, $g(x)=\dfrac{\cos ec\,x}{2}; x\in(0,2\pi)-\{\pi\}$ (where [.] denotes the greatest integer function)

List-I : Contains information about $f(f(x)), f(g(x)), f(2g(x)), g(f(x))$

List-II : Contains information about the continuity and differentiability of $f(f(x)), f(g(x)), f(2g(x)), f(2g(x)), g(f(x))$.

List-I		List-II	
A)	$f(g(x))=-2\ \forall x\in\left[\frac{5\pi}{4},\frac{5\pi}{3}\right]-\left\{\frac{3\pi}{2}\right\}$	P)	Discontinuous at $x=1$
B)	$g(f(x))=1$ for some $x\in(1,2)$	Q)	Continuous at $x=\frac{\pi}{2}$
C)	$f(f(x))=0$ for $\forall x\in\left[\frac{1}{4},\frac{1}{3}\right]$	R)	Discontinuous at $x=\frac{5\pi}{6}$
D)	$f(2g(x))=2$ for some $x\in\left[\frac{\pi}{6},\frac{5\pi}{6}\right]$	S)	Continuous at $x=\frac{\pi}{6}$
		T)	Discontinuous at $x=\frac{\pi}{2}$
		U)	Discontinuous at $x=\frac{\pi}{6}$

53. Which of the following is the only correct combination?

A) A-P,T **B)** A-R,T **C)** B-Q,S **D)** B-P,Q

54. Which of the following is the only correct combination?

A) D-R,T **B)** D-P,S **C)** C-P,U **D)** B-R,T
