SECTION – I
(SINGLE CORRECT ANSWER TYPE)

This section contains **FOUR (04)** questions.

- Each question has **FOUR** options (A), (B), (C) and (D). **ONLY ONE** of these four options is the correct answer.
- For each question, choose the option corresponding to the correct answer.
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +3 If **ONLY** the correct option is chosen;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : −1 In all other cases

1. Construct a geometric figure in a sequence of steps. In step 1, begin with a 4×4 square. In step 2 , attach a 1×1 square onto the each side of the original square so that the new squares are on the outside of the original square, have a side along the side of the original square, and the midpoints of the sides of the original square and the attached square coincide. In step 3, attach a $\frac{1}{4}\times\frac{1}{4}$ square onto the centers of each of the 3 exposed sides of each of the 4 squares attached in step 2. For each positive integer n, in step $n+1$, attach squares whose sides are $\frac{1}{4}$ as long as the sides of the squares attached in step n placing them at the centers of the 3 exposed sides of the squares attached in step n. The diagram shows the figure after step 4. If this is continued for all positive integers n, the area covered by all the squares attached in all the steps is $\frac{p}{q}$, where p and q are relatively prime positive integers. Find $p+q$.

A) 36 **B)** 84 **C)** 186 **D)** 336

3. Let $f : \mathbb{R} \to \mathbb{R}$ and $g : \mathbb{R} \to \mathbb{R}$ be bijective with $f(2) = 1$, $g(1) = 3$, $f'(2) = 4, g'(1) = 5$. The value of $\frac{d}{dx}[f^{-1}(g^{-1}(x))]$ at $x = 3$ equals $\frac{1}{k}$. Then k equals

A) 9 **B)** 20 **C)** 14 **D)** 28

4. Points E and F lie on diagonal $\overline{AC}$ of square $ABCD$ with side length 24, such that $AE = CF = 3\sqrt{2}$. An ellipse with foci at E and F is tangent to the sides of the square. Find the sum of the distances from any point on the ellipse to the two foci.

A) 26 **B)** 28 **C)** 30 **D)** 32

SECTION – II
(ONE OR MORE CORRECT ANSWER TYPE)

This section contains **THERE (03)** questions.

- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme :

Full Marks :+4 **ONLY** if (all) the correct option(s) is(are) chosen;
Partial Marks: +3 If all the four options are correct but **ONLY** three options are chosen;
Partial Marks: +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct ;
Partial Marks: +1 If two or more options are correct but **ONLY** two options are chosen, and it is a correct option ;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : –2 In all other cases.

For example, in a question, if (A), (B) and (D) are the ONLY three options corresponding to correct answers, then choosing ONLY (A), (B) and (D) will get +4 marks; choosing ONLY (A) and (B) will get +2 marks; choosing ONLY (A) and (D) will get +2 marks; choosing ONLY (B) and (D) will get +2 marks; choosing ONLY (A) will get +1 mark; choosing ONLY (B) will get +1 mark; choosing ONLY (D) will get +1 mark; choosing no option (i.e. the question is unanswered) will get 0 marks; and choosing any other combination of options will get -2 marks.

5. For $f(x) = x^4 + |x|$, let

Then which of the following options is/are correct ([] is Greatest Integer Function)

A) $[I_1] = 3$ **B)** $[I_2]$ is a composite number

C) $[I_1 + I_2] = 4$ **D)** $[I_1]$ is an even prime number

27. A ball 'A' of mass, $m = 1\text{kg}$ moving with an initial velocity $v_0 = 5$ m/s collides elastically with another stationary ball 'B' of the same mass $m = 1\text{kg}$. At the moment of impact, the angle between the straight line passing through the centres of the balls and the direction of the initial velocity of the striking ball 'A' is $\theta = 37^\circ$. Assuming the balls are smooth then find the kinetic energy (in Joule) of the striking ball that turned into elastic potential energy at the moment of the maximum deformation.

28. Four resistance R, 3R, R and 3R are connected as shown in figure. The two voltmeters are identical and Ammeter is ideal. The readings of ammeter and voltmeter are shown in the diagram. The value or R is (in ohm)

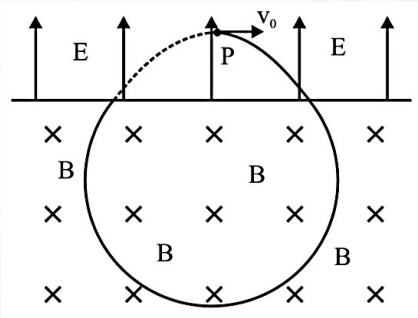

29. Initially a disc of radius 30 cm was in rest & we apply force F as shown in figure. If friction acting on disc is zero the find the value of x (in cm).

30. A point-like negatively charged particle is projected from a point P of a uniform electric field having magnitude 100 N/C in the direction perpendicular to the electric field with a velocity v_0. Uniform magnetic field having magnitude 10 T is also present, which is perpendicular to both the electric field vector E and to the initial velocity v_0. The two types of fields are separated by a plane, which is perpendicular to the electric field vector, as shown in figure. (The whole arrangement is in vacuum, and the effect of the gravitational force on the particle is negligible). The value of v_0 for which the charge particle returns to its initial point of projection is (in m/s)

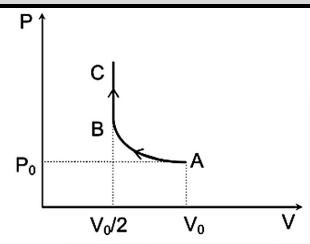

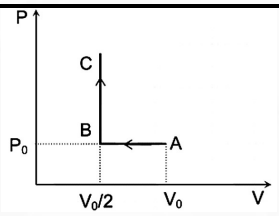

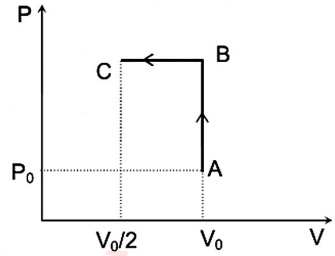

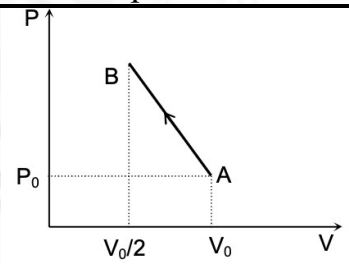

SECTION – IV
(MATCHING TYPE)

This section contains **FOUR (04)** Matching List Sets.
- Each set has **ONE** Multiple Choice Question.
- Each set has **TWO** lists : **List-I** and **List-II.**
- **List-I** has **Four** entries (I), (II), (III) and (IV) and **List-II** has **Five** entries (P), (Q), (R), (S) and (T).
- **FOUR** options are given in each Multiple Choice Question based on **List-I** and **List-II** and **ONLY ONE** of these four options satisfies the condition asked in the Multiple Choice Question.
- Answer to each question will be evaluated according to the following marking scheme :

Full Marks:+3 **ONLY** if the option corresponding to the correct combination is chosen;
Zero Marks: 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks: –1 In all other cases.

31. Monoatomic gas at pressure P_0, volume V_0 and temperature T_0 is enclosed in a piston-cylinder such that piston is free to move inside the cylinder. The gas is compressed to volume $\frac{V_0}{2}$ through various process. List-I describes four processes and List-II gives pressure of gas in final state C.

SECTION – II
(ONE OR MORE CORRECT ANSWER TYPE)

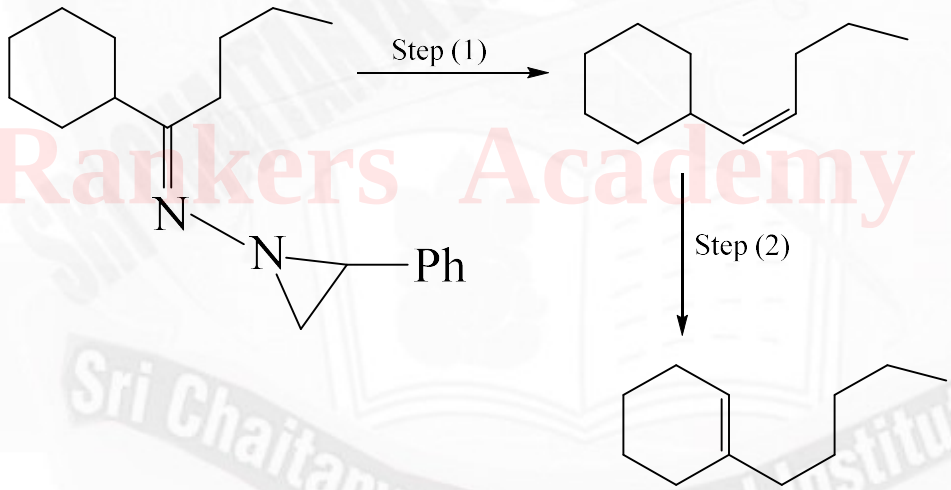

This section contains **THERE (03)** questions.

- Each question has **FOUR** options (A), (B), (C) and (D). **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s).
- Answer to each question will be evaluated according to the following marking scheme :

Full Marks :+4 **ONLY** if (all) the correct option(s) is(are) chosen;
Partial Marks: +3 If all the four options are correct but **ONLY** three options are chosen;
Partial Marks: +2 If three or more options are correct but **ONLY** two options are chosen, both of which are correct ;
Partial Marks: +1 If two or more options are correct but **ONLY** two options are chosen, and it is a correct option ;
Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered);
Negative Marks : –2 In all other cases.

For example, in a question, if (A), (B) and (D) are the ONLY three options corresponding to correct answers, then choosing ONLY (A), (B) and (D) will get +4 marks; choosing ONLY (A) and (B) will get +2 marks; choosing ONLY (A) and (D) will get +2 marks; choosing ONLY (B) and (D) will get +2 marks; choosing ONLY (A) will get +1 mark; choosing ONLY (B) will get +1 mark; choosing ONLY (D) will get +1 mark; choosing no option (i.e. the question is unanswered) will get 0 marks; and choosing any other combination of options will get -2 marks.
